Care and Maintenance

Regular cleaning is the best way to keep Crossville Mosaics tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth to prevent water spots. No waxes or sealers are needed. More information regarding the care and maintenance of Crossville products is available at www.crossvilleinc.com.

* NOTE: Wet area use for Classic Mosaics and Color Blox Mosaics

Crossville produces both of these products with the Cross Sheen finish. They exceed current ADA guidelines and deliver a wet static coefficient of friction equal to or greater than 0.6 on the surface of the tile. Their small 3" x 3" size ensures frequent grout joints and provides traction and drainage.

Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water and poor surface cleaning.

This information is provided so that customers may make a realistic and informed decision when comparing Classic Mosaics and Color Blox Mosaics to other tile products in wet area environments, such as residential/commercial bathrooms, showers and interior pool decks.
