*** NOTE: Wet area use for Classic Mosaics and Color Blox Mosaics**

Crossville produces both of these products with the Cross Sheen finish. They exceed current ADA guidelines and deliver a 'wet' static coefficient of friction equal to or greater than 0.6 on the surface of the tile. Their small 3" x 3" size ensures frequent grout joints and provides traction and drainage.

Crossville **cannot control** situations involving incorrect installation, improper slope to the drain for elimination of standing water and poor surface cleaning.

This information is provided so that customers may make a realistic and informed decision when comparing Classic Mosaics and Color Blox Mosaics to other tile products in wet area environments, such as residential/commercial bathrooms, showers and interior pool decks.
