Crossville's Commitment to the Environment

A member of the U.S. Green Building Council, Crossville, Inc. is committed to protecting the environment through our quality manufacturing processes and by offering recycled and environmentally friendly products.

Our waste-water policies exceed government standards and we have earned several citations for effective waste-water practices. Nearly 100 percent of the water used in manufacturing is recycled back into our processes; the minimal amount that is not recaptured is returned clean to its natural habitat.

Crossville's dust collection procedures not only allow us to limit air pollution, both inside and outside our plants, but allow us to reuse unfired raw scrap materials during manufacturing. While this reuse does not constitute recycling, it does minimize landfill deposits while conserving raw materials.

Recommended Usage

Color Blox EC is recommended for interior floors (except where standing water may occur), walls and countertops and exterior walls in both commercial and residential environments.

Care and Maintenance

Regular cleaning is the best way to keep Color Blox EC tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth to prevent water spots. No waxes or sealers are needed. More information regarding the care and maintenance of Crossville products is available at www.crossvilleinc.com.
